

Software Engineer (Ruby on Rails)

Do you like writing mean and clean Ruby code? Come join our team and help us build amazing things. We're looking for someone with a passion for programming and for writing beautiful code. You will join a team of exceptional engineers working in a fast-paced environment to deliver world-class software.

Responsibilities

- Write clean, maintainable and efficient code
- Design robust, scalable and secure features
- Contribute in all phases of the development lifecycle
- Follow best practices (test-driven development, continuous integration, SCRUM, refactoring and code standards)
- Drive continuous adoption and integration of relevant new technologies into design

Requirements

- At least 1 year work experience as a Ruby on Rails developer
- Strong English communication skill is a must
- Proven work experience in software development
- Demonstrable knowledge of HTML, CSS, and JQuery
- Experience developing highly interactive applications
- A firm grasp of object oriented analysis and design
- Passion for writing great, simple, clean, efficient code
- Good knowledge of relational databases
- BSc in Computer Science, Engineering or relevant fields is an advantage but not required or equivalent work experience.

Additional Requirements:

- Need to be an inspiring team member and proactive communicator
- Ability to understand the requirements of our international clients
- Humility and knowing how to encourage team members
- Good and friendly character, able to work in a team
- Go-minded spirit ("yes, we can...")

Job Location:

Switzerland
